## Student Solutions Analyst

## Job Advert

We are looking for an enthusiastic team worker who has an interest in applications development in a large corporate environment. We are responsible for all new application solutions within the council whether this is developed in-house or by working with suppliers.

You will have the opportunity to understand and be part of the processes involved in designing, developing and marketing several large corporate websites, building new websites and applications. You will also deal directly with staff at all levels and across all Service areas, experience working as part of a dynamic team and contribute to the strategic development of online services.

## Job Purpose

Assist the ICT Applications Solutions Team with day-to-day operations, development and the continuous improvement/development of over 280 web-based projects.

## Main Tasks

- Develop new applications or maintain existing applications using C# .Net, MVC, PHP, HTML, Bootstrap, CSS
- Be involved in full application development lifecycle
- Work with customers to analyse requirements
- Develop websites using CMS systems such as WordPress and Umbraco
- Contribute to ongoing site developments and design improvements
- Work with the Website UX team to enhance user journeys across the website

## Job Advert Experience / Qualifications / Personal Qualities
